/html is the root directory for the web server (nginx) running on ai1. The public URL is https://108.213.157.99 (via SWAG edge container). The directory contains:

• `index.html` (default page)
• `css/`, `js/`, `images/` (static assets)
• `docs/` (documentation files served via doc-api at localhost:5051)
To view contents:

```
curl -k https://108.213.157.99
```

The web server is configured to serve files from `/usr/share/nginx/html` (inside the SWAG container). The `nginx -s reload` command would update the configuration.
